

PERQUEST MULTI BUSINESS SOLUTION SAVES ACCOUNTANTS AND BOOKKEEPERS TIME AND MONEY

Perquest, Inc., an [online payroll company](#), announces a new feature that makes payroll easier for accountants and bookkeepers who process payroll for multiple clients.

Oakland, CA. / December 10, 2008 – Perquest, Inc., a provider of [payroll services](#), announced today a new feature that will simplify payroll for accounting professionals who process payroll for multiple clients.

Using a logical and intuitive design, the Multi Business feature gives accountants and bookkeepers the option to process payroll for multiple clients easily, accurately, and best of all quickly, with one simple login.

A demo highlighting the Multi Business feature is available at www.perquest.com.

“Time is money, and accounting professionals who process payroll for more than one client, will experience a new way to save time with the Multi Business feature,” said Cheryl Paterson, Chief Information Officer for Perquest.

With one convenient sign on, accountants and bookkeepers are brought to an overview page where they can sort, review, approve and submit payroll for multiple clients.

A built-in reminder system notifies accountants and bookkeepers about important dates such as payroll due date and bank funding dates.

The Perquest Error-Buster technology allows payroll to be processed accurately and efficiently while reducing, and even eliminating time spent correcting errors.

Other benefits of the Multi Business feature include easy navigation and quick access to details about a client’s most recent payroll. It also offers a list of each client’s payroll services, and access to their workforce pay data.

From the workforce tab, accounting professionals can quickly review and edit information about their client’s employees. With just a few mouse clicks, they can update items such as direct deposit, paid time-off, tax status and more, as well as add information about a new hire.

Because the Multi Business feature maintains historic payroll information, it's easy to generate a variety of reports including client Analytics through Perquest's exclusive Analytics tool. Perquest Analytics automatically generates easy to read graphical reports that help businesses identify and manage key performance indicators such as employee turn-over, paid time-off, and paid overtime.

The Multi Business feature can also be used by businesses or organizations that oversee various divisions or multiple locations.
